A DRIVING FORCE

NUXATEDIRON

BEHIND KEEN, SUCCESSFUL MEN AND WOMEN

When you think of the successful men and women you know-people who are doing things worth while-you will find that they possess force, vim and energythe kind that simply brim over when the blood is filled with iron. Nuxated

Iron, by enriching the blood and creating new red blood cell s,strengthens the nerves, rebuilds the weakened tissues and helps to instill renewed force and energy into the whole system. Three million people use it annually as a tonic, strength and blood-builder.

MAKE THIS TEST

See how long you can work or how far you can walk without becoming tired; next take two five-grain tablets of Nuxated Iron three times per day after meals for two weeks. Then test your strength again and see how much you have gained. Numbers of nervous, rundown people who were ailing all the while have most astonishingly increased their strength and endurance simply by taking iron in the proper form.

tions beyond the definitely appearled field.

One of Litvinoff's first moves was to propose to Mr. O'Grady that the allies lift their blockade on soviet Russia. The taxt, it is considered here, bears out the view expressed among members of the diplomatu corps in London that Litvinoff, on behalf of the Bolshavik regime in Russia, intended to make other proposals than those relating to prisoners.

There are runders that the Bolsheviki will try to effect a prace with the entents through Mr. O'Grady.

Frivate netween concerning the conference in Copenhages say that the Bolsheviki attitude is most conclinatory Anima; other things, Lalvinoff is said to have offered to telegraph Moscow, Petrograd and other Bolshevik eithes to obtain full reports as to the condition of British cubjects in those places.

While Great Britain is deeply interested in the tend of affairs at Copenhages, it is reaffired to take Mr. O'Grady as been definitely instructed to enterm no negotialions beyond those reating to prisoners.

Is Coldest Place in Nation.

in Nation.

CHICAGO, Nev 28—Snow ranging in depth from two feet to an mich today covered most of the country between the Mississippi river and the Sierra Nevada mountains, and from Canada to Northern Texas, with low temperatures prevailing throughout the area. A slight snowfall occurred in Northern Illinois indiana and as far east as Toledo, C. while word came that some snow fell in Los Angeles. Cal., and that two inches of snow covered the ground at the aviation field near Riverside, Cal. South of the snow belt rains fell and foods swept the lowlands bordering the Salt and Agua Fria rivers in Arizona, with possible loss of life.

Suffering in many places in the central and southwest was in prespect by cause of the extreme coid and the limited foel supply resulting from the odd, strike. Cattle on the western ranges also were reported endangered.

In the Western plains states troins were badly delayed and wire communication was crippled.

Lander, Wyo., was the coldest place in the country, according to reports, the temperature there being 25 degrees below zero. At Abliene, Tex., it was six degrees above zero.

UNDER FLOOD OF WATER

PHOENIX, Aris., Nov. 28. Portions of this city were under water today inhabitants of the lowlaids along the Salt river and Agua Fria river had field to safety, and many homes had been swept away by the flood caused by excessive rains and the breaking of the Arisona canal.

Reports of a number of families marooned on islands formed by the flood waters have reached here and fear was expressed there had been loss of life.

MYSTERIOUS FIRE IS SEEN NEAR HICKMAN

HICKMAN, Ky., Nov. 28 (Spl.)—
J. H. Langford, well-known farmer residing on a bill track farm south of town, states that for many years, at different intervals, he has seen some mysterious fire in a certain draw or hollow on his furm. This fire leaves no trace of its burning, yet it is sufficient to "light up plainly the tops of the tallest trees in the immediate vicinity."

He says the fire has all the appearance of an old log burning, but when approached usually "goes out" when one gets within a few yards of it. On one occasion (and the first time he saw it was 25 years ago), be thought it was a log on tire. That time it was on the hill instead of the hollow, and he and his son, Bennett, went to it with the litention of putting it out. When they reached the little hill on the opposite side of the rayine, a section of some five to seven feet went out; after a few seconds at blazed an again. Mr. Langford described it as a fire "about 20 or 30 feet long."

Every now and then this mysterious fire, which burns without starting and without firel, occurs and is always in a certain place. He has quil thinking much about it since he has found that it is not endangering his property. It somerally occurs only at uisht. Whether is a form of gas, burnted by spontaneous combustion, or a leaky "atticling," is not known. He is sure, however. It is not known. He is sure, however. It is not known. He is sure, however. It is not known. He is sure, however.
